

Where Costco comes for the right roof, every time, every location.

Polyfoam Roof / Single Ply Roof / Urethane Metal Roof Coating System

“Barrier’s people are top-notch professionals.”

*Wes Clayton
Quality Control Manager,
Span Construction & Engineering*

COSTCO STORES THROUGHOUT NORTH AMERICA

The challenge

Costco stores may look similar, but each has a unique set of roofing challenges based on its geographic location, climate and the condition of its existing roof. At Barrier, we understand these challenges and offer a variety of solutions for Costco stores in all areas of the United States.

The process

- Polyurethane foam roofing
- Single-ply roofing
- Urethane metal restoration system

The result

We offer three basic roofing systems for Costco stores: polyurethane foam, PVC single-ply and metal urethane coating. Each of these is customizable to accommodate virtually any set of geographic, climatic or roofing conditions. Which is why Costco trusts Barrier to provide the best roofing solution for each unique store.
